Education

UNIVERSITY OF INDIANAPOLIS

Indianapolis, IN

BS in Computer Science, Summe Cumme Laude

May 2026

Relevant Coursework: Comp Arch & Parallel Computing, Networks & Distributed Computing, Data Structures and Algorithms, Database Systems, Operating Systems, Big Data Mining, Computer Algorithms, Software Validation & Testing
Dean's Scholarship, University of Indianapolis (2022-26)

NEW PALESTINE HIGH SCHOOL

New Palestine, IN

Honors High School Diploma

June 2022

Technical Skills & Projects

Programming: C, C++, C#, Java, JavaScript, SQL, Python, HTML, CSS, TypeScript

Frameworks/Tools: React, Flask, Node.js, TensorFlow, Docker, Git, Linux, AWS, Google Cloud, MySQL, MongoDB, Ansible

Image Classification Network: CSCI 424 Final Project

Jan. 2024 - May 2024

Implemented a classification network using TensorFlow in Python. Trained the network to identify the time of day of a photo taken. Used Python to scrape all the images from the universities S3 Bucket URL.

Robotics Course Projector: CSCI 496 Project

Aug. 2025 - May 2026

Team used agile methodology to create system to display tracks on the ground for the freshman robotics project using a projector and raspberry pi. Implemented live keystone correction feature for precise image. Implemented functionality to remotely turn off projector using the command-line function "cec-client" via a subprocess. Connected multiple functionalities to a frontend website using react and flask to call the backend application remotely. Created Ansible Playbook for use when recreating the system.

3D HTML Game: CSCI 310 Project

Aug. 2025 - Dec 2025

Created an HTML-based 3D first person tower defense game using 3JS Library. Hosted multiplayer server with up to 4 players using Node.JS.

Web-Based Event Scheduler: SWEN 200 Project

Aug. 2025 - Dec 2025

Large team implemented a web-based application to schedule events using Google Cloud, TypeScript, Svelte, and N8N in a team-based, AGILE format. Implemented backend functionalities to remove attendees from an event and retrieve the URL of an event. Implemented the frontend interface page to edit an event

Relevant Experience

WALMART

Greenfield, IN

TEAM ASSOCIATE

Dec. 2021 – Dec. 2025

Organized merchandise of subdepartments including pulling new merchandise from storage. Conducted exceptional customer service.
